

DBM FIBER STRIPS

100% DBM Fibers

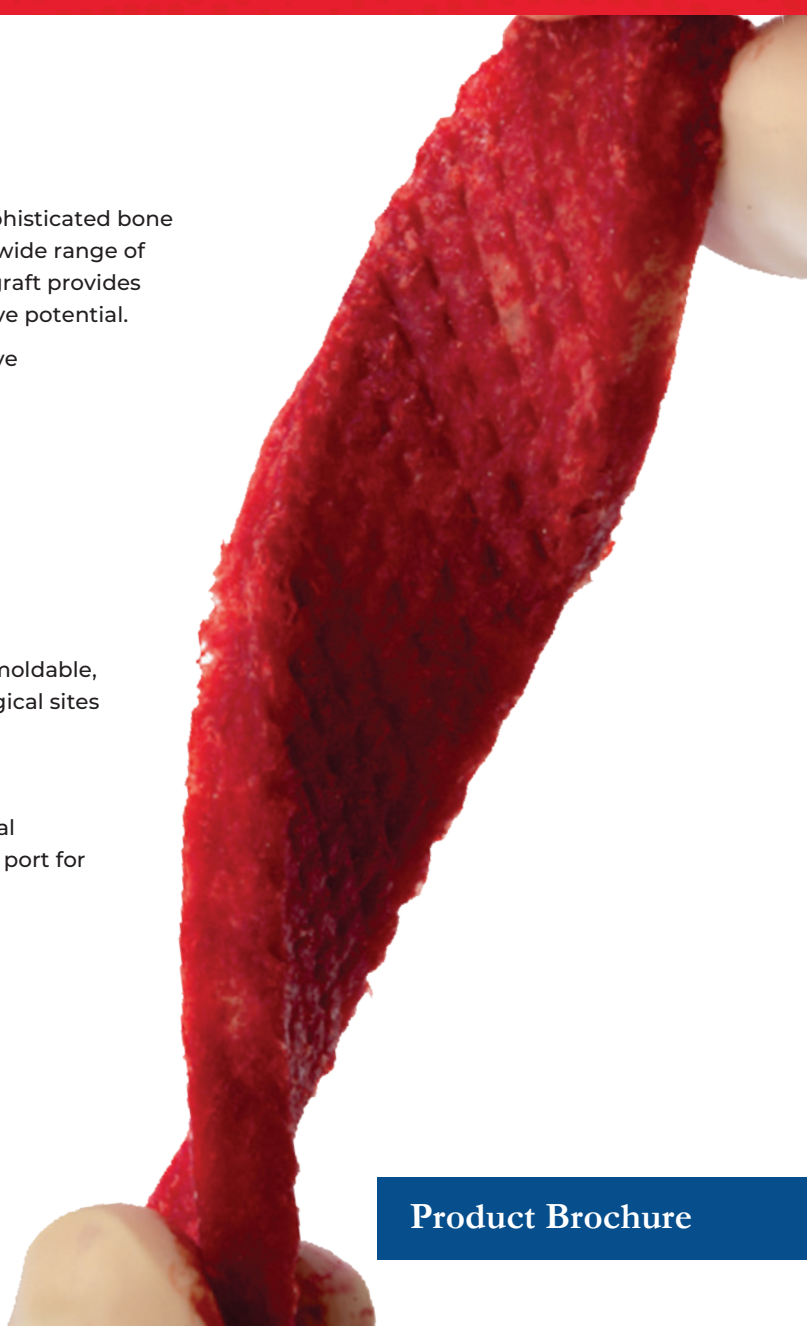

100% DEMINERALIZED CORTICAL FIBERS

Demineralized Cortical Fibers offer a sophisticated bone grafting solution designed to support a wide range of surgical procedures. This advanced allograft provides enhanced malleability and osteoinductive potential.

Meticulously processed to preserve native biomechanical properties.

FEATURES & BENEFITS

- 100% demineralized bone means no extrinsic carrier
- DBM Fiber Strips can be cut when dry
- When hydrated, DBM Fiber Strips are moldable, packable, and can be used to span surgical sites such as posterolateral gutters.
- Irrigation resistant
- Packaged for rapid rehydration in a dual sterile barrier with integrated injection port for autologous fluids.
