

Simple, Safe Fusion created for Pain Care Specialists

SIMPLE, SAFE... SiLO™

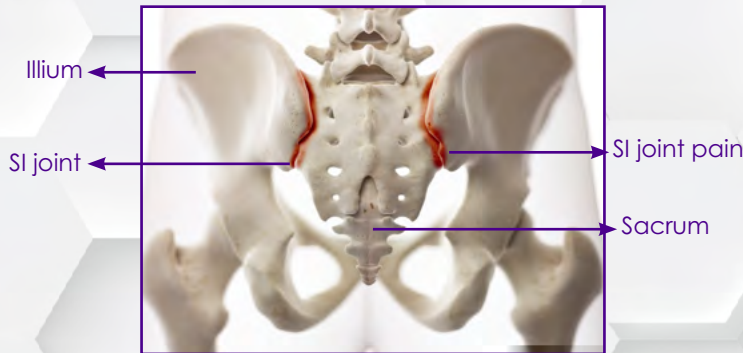

SiLO™ is a simple allograft uniquely designed for the SI joint. Made of human cortical bone and developed to provide a simple, safe & reproducible method of fusing the sacroiliac joint.

The SiLO™ system is less invasive than traditional sacroiliac fusion procedures.

Less blood loss may be expected during the SiLO™ surgery and patients may enjoy a quicker time to recovery.

Warning: This product has labeling limitations. See package insert for complete information.

CAUTION: Federal law (USA) restricts this device to sale by or on the order of a physician.
