

F3D-Z CERVICAL

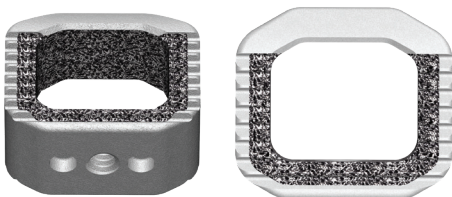

Interbody Cage System

SYSTEM ADVANTAGE

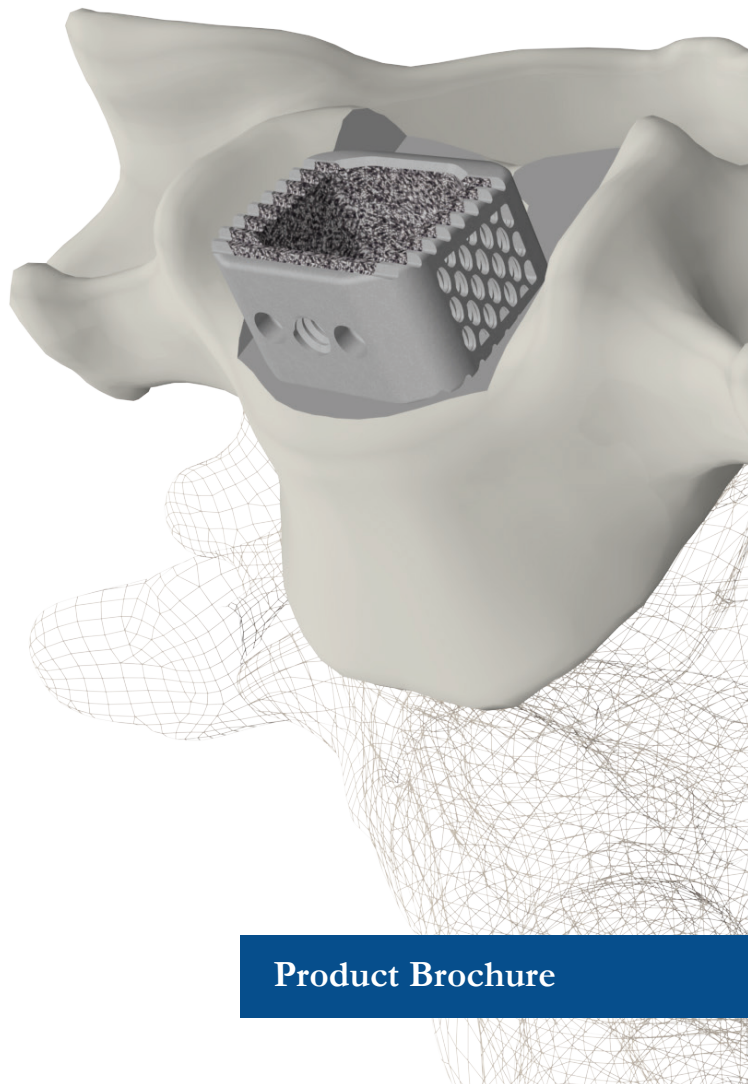

The **F3D-Z Cervical Interbody System** incorporates elegant instrumentation, proven implant geometry, and the revolutionary properties of **patented Mimetic Metal®** technology.

SYSTEM FEATURES & BENEFITS

- 100% open-pore architecture
- Bulleted insertion end
- Increased osteoblast function compared to PEEK and machined titanium shown in cell culture*
- Greater bony on-growth and in-growth compared to machined titanium shown in an in-vivo sheep model*
- Hydrophilic trabecular endplates designed for optimal blood flow
- Streamlined support structure minimizes density, allowing high quality imaging
- Compatible with Varisync® Cervical System instrumentation

Product Brochure

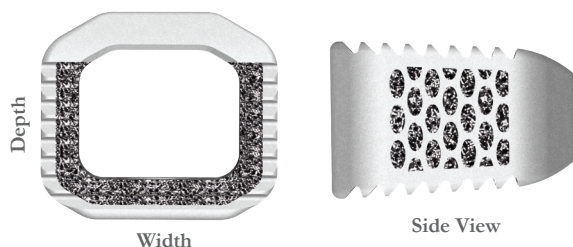

F3D-Z OVERVIEW

The F3D family of interbodies offer a wide range of footprint, height, and lordosis options, and are created through a proprietary 3D-printing and finishing process.

SPECIFICATIONS

F3D-Z Cervical Interbody

- **Standard Footprints** (Width x Depth):
 - 14mm x 12mm
 - 16mm x 14mm
- **Heights:** 5mm-12mm (1mm increments)
- **Lordosis:** 6°, 10°
- Titanium alloy
- Up to 1.1cc graft volume capacity

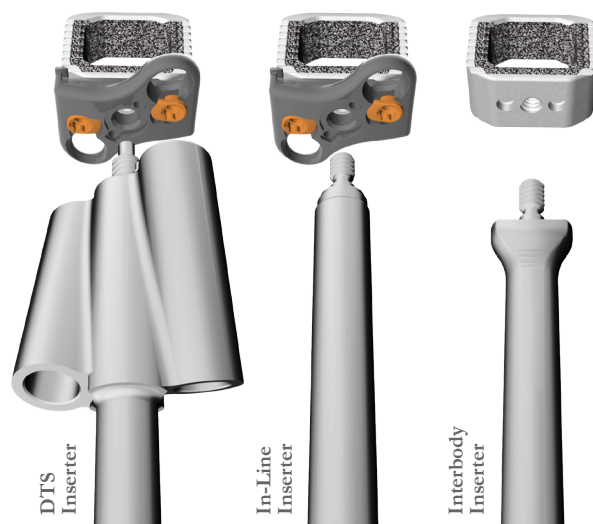

INSTRUMENTATION

Inserter Options

Three inserter options can be used with the F3D-Z cage to accommodate surgeon technique or preference.

- Varisync Cervical DTS Screw Guide Inserter (690-1000-XX)
- Varisync Cervical In-Line Inserter (690-1006)
- Standard Interbody Inserter (20-2002)

ADDITIONAL CERVICAL INTERBODY OPTIONS

Zavation's cervical interbody portfolio also includes Varisync®, IBF, Ti3Z®, Whitney®, and Labyrinth®. The Varisync cervical interbody can be assembled to the Varisync plate for a stand-alone construct. The F3D-Z, IBF, Whitney, and Labyrinth cages cannot be attached directly to the Varisync Plate, but can be inserted simultaneously with the DTS or In-Line inserters.
